

*Environmentally conscious moving with confern –
we protect the climate.*

For over 10 years now, confern has been offsetting the greenhouse gases generated by its relocations via the non-profit climate protection organization Atmosfair, thereby supporting climate protection projects around the world.

Through our cooperation with Atmosfair, we are committed to offsetting the impact of climate-damaging greenhouse gases on the environment.

Have we aroused your interest and would you like to do more for the environment?

We would be happy to give you the opportunity to do so.
Move - protect the climate - and this is how it works:

The following link will take you directly to our Atmosfair partner site where you can immediately offset your own carbon footprint.

<https://co2offset.atmosfair.de/co2offset?p=1000006250#/fix>

You too can help to protect the climate.

You will receive a personal certificate and a donation receipt from atmosfair for your contribution. Your climate protection contribution is tax-deductible.

2011 - 2021 10 Jahre Kooperation mit atmosfair

In Deutschland verursacht jeder Mensch durchschnittlich ca. 11 t CO₂ pro Jahr.

2 t CO₂ jährlich - das ist die Richtschnur, an die wir uns halten müssen, wenn wir Umwelt und Klima auch für kommende Generationen schützen wollen.
